EXPERIENCE

- Amazon**
Sr. Software Engineer
Oct 2023 – Present
Software Engineer
July 2019 – Sep 2023

AWS Key Management Service (KMS)
 - Engineering lead for the KMS control plane API team - 5m+ TPS key encryption and signing APIs used by 100k+ customers with \$200m+ annual revenue
 - API Bar Raiser - reviewed and approved multiple new AWS service launches, influenced service launch strategies at the director-level, and advised on hundreds of new AWS API features
 - Designed and led development of multi-region encryption key rotation for customer-generated key material - KMS' #1 customer-requested feature for multiple years
 - Collaborated with S3, EC2, EBS, and other foundational services to implement internal API authorization and IAM security controls**AWS Signer**
 - Engineering lead for industry-first code signing, certificate management, and revocation features
 - Designed and led development of:
 - OCI container image signing and revocation - Signer's most-used public feature
 - SSM command and document signing - a significant cross-org collaboration
 - KMS-backed certificate service that manages signing keys for Amazon's commercial mobile apps
 - 100k+ TPS signing and revocation service for globally distributed mobile app updates
 - Optimized AWS Signer's compute resources to save \$1.2 million/year in expenses
- Apple**
Software Eng Intern
May 2018 – Aug 2018

Apple Pay Security
 - Developed the iOS system daemon used in the Apple Card credit application process
 - Built a Swift iOS application for internal end-to-end testing of the Apple Card signup workflow
- Uber**
Software Eng Intern
May 2017 – Aug 2017

Threat Operations
 - Implemented monitoring that expanded the scope of internal abuse detection by 45%
 - Refined detection signatures that reduced inbound false-positive alerts by 28%
- Difenda**
Security Eng Intern
May 2016 – Aug 2016

Cyber Intelligence & Digital Forensics
 - Wrote a Python web crawler to index the dark web for potentially-leaked customer data
 - Implemented a scalable distributed port scanner with AWS EC2

EDUCATION

Univ. of Waterloo Bachelor of Computer Science with Business Option

TECHNICAL INTERESTS

Security Applied Cryptography - Encryption, Code Signing, Public Key Infrastructure | Penetration Testing
Systems API Design | Highly Scalable/Available Systems | AWS - Compute, Storage, Networking, Serverless
Programming Object-Oriented Programming - Java & Python | Full software development lifecycle

CERTIFICATIONS

OSCP Pentesting - Offensive Security Certified Professional
CCNA CO & RS Networks - Cisco Certified Network Associate: Cyber Ops, Routing & Switching
